WHY THIS FYP

I am a highly motivated BS Cybersecurity student at UMT (Reg. F2024408017) with hands-on experience building full-stack marketplaces, integrating AI automation, and shipping production-grade web applications. The AI-Based E-commerce Platform for Brands is precisely the intersection of everything I have been building toward — scalable marketplace architecture, AI-powered recommendation and chatbot systems, and real-world industrial deployment. I bring not just academic preparation but a working portfolio of marketplace products and a deep hunger to take this project from concept to production.

EDUCATION

BS Cybersecurity — University of Management & Technology (UMT), Lahore

2024 – Present

Registration No. F2024408017 · CGPA: 3.0+

FSc Pre-Engineering — Punjab Group of Colleges, Lahore

2022 – 2024

TECHNICAL SKILLS

Languages	Python JavaScript (ES6+) · HTML5 · CSS3 · SQL · C++
Frameworks	FastAPI · React · Node.js / Express
AI / ML	Chatbot design · OpenAI API · AI automation · Wati WhatsApp AI
Databases	PostgreSQL · Supabase · SQLite · Firebase Firestore
DevOps	Railway · Vercel · Render · GitHub Actions
Cyber	Nmap · Wireshark · Burp Suite · Network security · Ethical hacking methodology
MERN	MongoDB · Express · React · Node.js (actively upskilling for this FYP)

RELEVANT PROJECTS

TradeHub PK — Full stack B2B Wholesale Marketplace

2025–2026 [🌐 Live](#) [💻 GitHub](#)

- ▶ Multi-vendor marketplace for Pakistan's textile sector with supplier directory, product listings, buyer & supplier dashboards, and admin panel.
- ▶ Premium UI/UX overhaul to Apple/Stripe-level aesthetic: glassmorphism, scroll-reveal animations, live filtering — fully preserved backend.
- ▶ Directly mirrors the FYP scope — storefront creation, product management, search & filtering, scalable multi-category design.

Tech: FastAPI · PostgreSQL · HTML/CSS/JS · Railway · Vercel

Student Market Palace — Campus Buy & Sell Platform

2025–2026 [🌐 Live](#) [💻 GitHub](#)

- ▶ Full-stack marketplace with university email restriction, JWT auth, real-time product cards, and AI chatbot widget v4.0 (Web Audio API).
- ▶ Integrated AI knowledge base (PDF + JSON) for WhatsApp automation via Wati.
- ▶ Deployed on Railway (backend) + Vercel (frontend); production-ready with complete debugging cycle.

Tech: FastAPI · Supabase/PostgreSQL · HTML/CSS/JS · Railway · Vercel

Secure WiFi Network Configuration — Computer Networks Project

2025 [💻 GitHub](#)

- ▶ Cisco Packet Tracer simulation of a WPA2-AES secured enterprise wireless network with 10 documented configuration steps.

- Covers SSID management, authentication, access control, and network hardening best practices.

Tech: Cisco Packet Tracer · WPA2-AES · Network Security

Brall Community Heritage Site — Fullstack + Admin Panel

2025–2026  [Live](#)  [GitHub](#)

- FastAPI + Supabase platform with navy/gold branding, gallery, history sections, and protected admin panel.

Tech: FastAPI · Supabase · Railway

Library Management System — C++ Console Application

2024  [GitHub](#)

- Full CRUD library system in C++ with book records, member management, borrowing/return logic, and file persistence.

Tech: C++ · OOP · File I/O

Professional Portfolio (Personal)

Build with Html and CSS/Java

Deployment: Vercel

RELEVANT COURSEWORK & CERTIFICATIONS

- Computer Networks & Network Security
- CCNA — Currently Enrolled
- Information Assurance
- Object-Oriented Software Design (OSSD)
- Solved labs on Try Hack me/Hack the box Academy
- Cyber Threats & Understanding — Alison (Completed)
- C++ Programming — Multiple Projects(Availabe on Github)
- Ethical Hacking Methodology

EXPERIENCE

Freelance Full-Stack Developer & AI Automation

2024 – Present

- Delivering web development, security testing, and AI automation services to clients via arslansaeed.live.
- Projects span e-commerce platforms, government portals, React apps, and WhatsApp AI integrations.

CodeAlpha Virtual Cybersecurity Intern (Upcoming)

July 2026

- Accepted offer for virtual internship focused on practical cybersecurity tasks and hands-on tools.

WHAT I BRING TO THIS FYP

- I have already built two marketplace platforms end-to-end — the FYP problem space is my comfort zone.
- My AI integration experience (chatbots, WhatsApp automation, AI knowledge bases) maps directly to the recommendation and chatbot features described.
- I am comfortable with Python (FastAPI) and React; I am actively bridging to the MERN stack required by this project.
- I collaborate well with industrial partners — my projects include real-world deployment and client feedback cycles.
- I am available to begin meaningful summer contributions immediately before the Fall 2026 semester.
